- **Converts Dated Ignition Systems To Modern HEI Technology**
- **Easy To Install**
- **Improves Engine Performance**
- **May be Supplied With Red Or Black Cap (No Choice)**
- **Distributor May Not Clear High Rise Or After Market Manifolds**

Now with a simple distributor swap you can get all the benefits of HEI technology plus performance enhancements on top of the original HEI. For example the original HEI had a 38,000 volt module, pickup and coil, this unit provides 50,000 power packed volts! The original system had bushings in the housing, this model has needle bearings for smoother operation and longer life. Plus, this one-piece distributor has a 4340 hardened steel cam gear for use with all roller cams and brass terminals in the distributor for greater conductivity than the stock aluminum terminals. So when you compare this tachometer drive distributor to what your car came with you're getting a tremendous hi-performance distributor that eliminates the points and coil and gives you all the firepower you need for your Corvette's ignition. This unit simply bolts into place, all you have to do is run a 12 volt power lead to the distributor.

Be sure you are replacing the correct part. Always refer to a factory service manual when diagnosing electrical service problems. You can damage these parts if you do not follow the proper procedures. Electrical components are non-returnable parts.

The Corvette parking brake console seal is a component specifically designed for the model years 1967 to 1976 of the Chevrolet Corvette. This seal is located on the parking brake console, which is the area where the parking brake lever is housed in the center console of the vehicle. The purpose of the console seal is to provide a tight and secure seal around the parking brake lever, preventing dirt, dust, and other debris from entering the console area. It helps to maintain the cleanliness and functionality of the parking brake system by keeping unwanted particles out.

- For Use with 1967-1976 Chevrolet Corvettes
- Quality Reproduction Part
- Made of Plastic
- Finished in Black

We are very proud of the radios we produce and believe there is nothing like them on the market. Our attention to detail in creating each model we introduce is appreciated by the most selective owners of classic cars. Each radio is produced with 100% new parts that are custom tooled to match the look, feel and overall appearance of the original radio. You never have to cut or modify a dash to fit our radios in the car it was designed for. When in a dash, it is almost impossible to tell the difference between a new original radio and our reproduction. The sound performance however is quite different from the original and is considered to be the best in the classic car radio market. 45 Watts per channel allows even the user of a convertible to hear music clearly. We manufacture Dual Voice Coil speakers designed specifically for our radios to give the customer the best sound quality. AM/FM is available on all our radios even when the original radio was AM-only. Our radios come with options for accessories to be added by using the 3.5mm auxiliary plug in the back of the radio and the extension cable provided with each radio. You can run an IPOD, MP3 player, or Satellite radio. Bluetooth® wireless voice and audio is now a standard feature on all radio models. **NOTE: These radios are custom built per order and take from 8-10 weeks to be manufactured.**

- Increased durability and enhanced stability due to internal springs preventing fuel tube chafing
- Better security and durability with multiple redundant buttons on the fuel level sensor
- Improved durability with steel plated, all metal internal components
- Large volume reservoir maintains sufficient fuel in low fuel situations and vehicle cornering
- Longer pump life as a result of a two-strainer system keeping out contaminants
- Lower failure rates due to its innovative design and durability.
- Reduced potential for greenhouse gas emissions via the EVAP system because of integrated OE fuel vapor pressure sensor.
- Guaranteed correct gas gauge reading

1002487 Rear Brake Caliper Lip Seal Rebuild Kit, 1965-1982 10.99

Now you can convert your stainless steel sleeved Corvette calipers into the new and improved o-ring style calipers. Proven to last longer and perform better with this conversion kit than the factory style lip seals, this kit gives you everything, but the labor and fluid. No more weeping seals due to long periods in storage, but when in action, the o-ring provides a tight seal for maximum pressure and sure stops. Kit includes specially designed pistons, piston o-ring seals, outer boot seals and caliper half passage seals. NOTE: Each kit converts 1 caliper. Should be used with stainless sleeved calipers. Includes Pistons, O-Ring Seals, Dust Covers & Half-Seals.

- Looks Like A Factory Installation
- Easy To Install

1029460 Power Window Conversion Kit, 1956-1962 767.99

The original 1956-1962 manual window regulators were serviced as an assembly, and no individual parts were ever produced by GM. Repeated window use over the years results in a worn mechanism that will have sloppy engagement and movement. These new regulators effectively eliminate the need for refurbishing your originals.

Set includes a left and right 1956-1962 Corvette window regulators

Shaft length = 1 3/16 inches.

No bowtie. Includes mount kit.

NOTE: A great replacement for all 1953-1967 Corvettes. Correct for 1967 late production Corvettes.

All 1967's through serial #8000 used a "bowtie" outside mirror. Some 1967's serial #8000-10500 have also been found with the "bowtie" mirror. After serial #10500, the "no bowtie" mirror was used.

The diameter of the mirror head / glass on this mirror is 4 3/4"

STEERING

CONTROL VALVE & RELATED » *Control Valve*

The rebuilt power steering control valve sends fluid to the power steering cylinder. Control valves can wear and, with their multiple fluid connections, leaks are inevitable. Many control valves are replaced due to what appears to be excess play in the ball stud.

Announcing the NEW Steeroids Rack and Pinion steering conversion kit for 53-62 Corvettes which will update the 1940s steering design on these classics to 21st century standards. This is a true bolt-on kit that can be power assisted, something never offered on C1s from the factory! Steeroids do not require any drilling, cutting or welding on the vehicle. Tighter, more responsive steering feel and lighter weight are all advantages to this system. Steeroids rack and pinion kits include an exciting quick ratio rack yielding approximately 2.5 turns lock-to-lock at the wheel. Steeroids kits also include adjustable tie rod ends to effectively eliminate bump steer so that your car not only steers better, it actually handles better! Power kits include new steering column and power steering pump. Steeroids kits are completely bolt-on so an owner can return to the stock steering at any time, but why would they?

- Completely Bolt-On
- Tighter, More Responsive Steering
- Adjustable Tie Rod Ends To Eliminate Bump Steer

There are many reasons to replace the rear leaf spring on your C2 or C3 Corvette, which by now may have broken leaves or is simply fatigued. The most obvious symptoms of a rear leaf spring needing replacement are the ride height is too low and the car's handling is poor. Beyond symptoms, a weakened rear leaf spring harms the drivetrain by forcing the parts to run at an incorrect angle. This puts the U-joints in a tighter bind position, pushes the differential yokes into the pinion shaft, often requiring their replacement and places unnecessary wear on the differential clutch pack and the ring & pinion. Replacing the rear leaf spring will restore lost ride height and correct the myriad of problems associated with sagging, worn-out springs. This 9-leaf rear spring meets or exceeds factory specifications. It is heat-treated, as was the original, painted with black enamel and has rubber/vinyl liners to assure smooth, quiet operation.

A classic symptom of a bad wheel bearing in your C2 or C3 Corvette is noise. If a wheel is making "funny" noises when driving (squeaks, chirps, squeals, moans, etc.), or you hear a grinding noise when turning, it may indicate a bad wheel bearing. Other symptoms include steering wander or possibly a pull to one side when braking. This premium quality kit includes everything you need to replace your rear wheel bearings. Premium Quality Replacement Wheel Bearing & Seal Kit includes:

- 1 Inner Bearing And Race
- 1 Inner Seal
- 1 Outer Bearing And Race
- 1 Outer Seal

Note: 2 Required Per Car

Buying weatherstrip for your Corvette is an investment. Beyond the obvious benefit and duty of weatherstripping to keep you and your valuable interior dry, there are other key points to consider. For starters all of the weatherstrip components must fit properly so that moving parts like doors close easily without having to slam them. Additionally you want to make sure the parts have the right finishes and release agents built-in to the weatherstrip so that moving parts release smoothly without ever tearing the weatherstrip apart. Next, you want to make sure that all of the weatherstrip has the correct dimensions, molded ends (where applicable) and that any attachment points are just like the originals.

Due to the construction & design of this part, it must be bolted to a plate to prevent distortion during U-joint installation. The friction fit of the cups requires enough force during installation to warp the flange if it is not bolted to a plate during the pressing operation. These parts are lined bored to assure proper alignment.

If the item is not repairable it will be returned to the customer at the customer's expense. Items returned after 30 days in the original packaging you will be issued a refund to the original terms on the invoice less a 30% restocking fee. Items returned after 30 days not in the original packaging will be returned to the customer at the expense of the customer. No returns on electrical products or tools. Returns will not be accepted for any orders older than 90 days. No returns of a partial set, parts will be mailed back to the customer at customer's expense. (xxi) Pricing Policy: Prices, part numbers & policies are subject to change without notice. Please visit our website at %website% or

call us at %phone% for the most current pricing.

(xxii) Electrical Item Warranty: Motor City Vettes does not allow any refunds on electrical items, they can only be returned for exchange. All items that fall under this policy will be outlined in a disclaimer below the product name on the shopping cart page along with the product invoice. The reason that there are no returns on electrical items is that too many people try to take advantage of the return system. Instead of using proper diagnostic procedures, some people resort to trial-and-error parts swapping when they don't know how else to fix an electrical problem. When parts they have installed do not fix their problem, they want to return them and try something else. Electrical parts are easily damaged by improper installation or testing. Because electronics are very sensitive to voltage overloads, it does not take much of a voltage spike to ruin a component. Unplugging a wiring connector while the key is still on can create a momentary voltage surge of hundreds of volts. Crossing up the wrong wires or using the wrong test procedures can also damage sensitive electronics. We have no way of knowing whether or not the part has been used or damaged. Because of these risks there are no returns on electrical components. This policy will protect the next customer who might get a bad part that had been returned. Electrical items that are found to be defective within the first 30 days after receipt of product will be covered by our warranty policy. There are no exceptions to this policy.
