Old window seals are not only an eyesore for any Corvette; they are also a threat to your door internals. Your window seals are under a constant barrage from the elements causing them to shrink, crack and chip over time leaving your valuable internal door components and electronics exposed and prone to premature failure. Door window seals are one of the most important and affordable, yet often over looked seals on your Corvette.

1013304 Rear Suspension Knuckle, Right, 1988-1996 837.99

The 1984-1985 Corvette used an additional seal that was placed in the rear spindle knuckle to keep dirt, grit and water out and off of the bearing/seal assembly. This seal can be installed in all C4 1984-1996 rear suspension spindle knuckles to keep the bearing and seals clean. The seal fits in the spindle knuckle and the yoke is machined in the same manner whether you have a 1984 or 1996 suspension assembly. There is less chance of water or dirt entering the area between the spindle bearing yoke splines and the bearings seal area.

Damage to 2005-2011 C6 Corvette Front Skid Plate & Lower Radiator Support Cradles is very common. They are very susceptible to dents, cracks, and scrapes from running into parking lot stops and curbs. If the damage is serious enough your Corvettes radiator could be dislodged, creating havoc with cooling issues. If you have had a front end collision then you certainly must replace this item when rebuilding your Corvettes front end. Our new GM C6 Corvette Front Skid Plate & Lower Radiator Support Cradle bolts to the front frame extensions allowing you to return your Corvette to its factory condition. One way that you can help prevent your Corvette skid plate/radiator support cradle from being damaged is to install some of our C6 Corvette front bumper skid rollers. Our front bumper skid rollers take about an hour to install. They feature an active skid plate design with proprietary integrated urethane wheels that will eliminate costly front-end damage caused by lowering, steep driveways or other obstacles. Each set includes all necessary hardware. Welding is not required to complete installation but is recommended. NOTE: C5 support bracket shown.

Every time you apply the brakes, the factory rubber hoses expand under hydraulic pressure. Even a small amount of expansion is enough to make the pedal seem soft. Braided stainless brake hoses give you more confidence by delivering a faster response time and a firmer pedal.

- Increases Pedal Firmness

C7 Corvette owners are well familiar with the inadequacy of the stock cup holders to hold cans and bottles upright. In fact they would probably say they just flop all over the place during acceleration and braking because the stock holders are too short. The Stop Flop Cup Holder solves this problem because its unique design allows the holders to extend up and lock into place. This keeps cans and bottles upright so you don't have to worry about the "flop" and can enjoy your drive. And when you don't have drinks in the car you can push the cup holders down, close the console door and have a perfectly stock look. Stop Flop installs with Velcro easily and looks like a stock accessory. Buy one for your C7 today and stop the flop!

With this "One Man Job" Remote Clutch SPEEDbleeder Line, Tick Performance has taken great strides in making things much easier on you. At 4'+ in length, you're able to route the line to nearly anywhere on the car you want. Usually zip tie it to a brake line coming out of the brake master cylinder so it's easy to reach with the hood popped. Another huge improvement is our SPEEDbleeder end-allowing you to simply crack it open one time and close it once the air is out of the system, instead of having to open and close the bleeder with every pump of the pedal.

Take full control of your Stingray's 7 Speed Shifter! Eliminate your Computer Aided Gear Select and go for the gear you want anytime. The CAGS system was created by General Motors to ease fuel consumption. It forces you to shift from 1st to 4th gear during slow acceleration. We have designed a harness, the CAGS 7 Speed Skip Shift Bypass, that eliminates this nuisance. Our C7 Corvette 7-Speed Corvette Skip Shift Bypass allows you to disconnect the Computer Aided Gear Selection (CAGS) system at the transmission connector. This device will override computer control of the system and return gear selection choice to you. This custom-designed weathertac harness not only protects connectors from dirt/corrosion problems associated with an open-ended harness, but also allows you to easily reconnect the system if necessary, with no modifications.

There are 2 variations of the headlight actuator motor assemblies used on the 1997 and up C5 Corvettes. The 97-99 motor assembly (and some early 2000 models) is all aluminum and has a removable side cover that is held on with 3 machine screws. The gear kit for the 97-99 motor assembly includes a new side cover gasket. The late 2000+ motor assembly is partially plastic (the gear case is plastic - the motor is steel) and it has a glued on plastic side cover. This cover needs to be pried off (broken at the factory glue joint) to replace the worn gear. The cover is easy to pry off and I include a packet of urethane glue to reglue it back on. Included with each replacement gear is a packet of high temerature grease that will not dry out quickly like the grease used by the original manufacturer. Also included: Complete step by step detailed rebuilding instructions and how to remove the headlight motor assembly from the car. If you have a 97-99 C5 Corvette there is the possibility that one or both of the early aluminum type headlight motor(s) have been replaced with the newer 2000+ style plastic type headlight motor(s). To ensure you receive the correct kit please check to see if the headlight motor(s) in your 97-99 (and early 2000) C5 are plastic or aluminum. The aluminum housing style is the original equipment used on the 97-99 (and some early 2000) C5 Corvettes. They will have 3 screws holding the side cover one while the 2000+ headlight motor assemblies are plastic and the side cover is glued on. This newer style headlight motor change can occur because the 97-99 style motors are no longer available through GM. If a previous owner or a GM dealer has replaced a headlight motor in a 97-99 they may have installed the newer 2000+ style. A quick check will ensure that you order the correct rebuild kit.

1024906 Headlight Motor Bronze Gear Repair Kit, 1997-1999 49.99

- Upgrade Replacement For Stock Plastic Gear
- Made Of Bronze For Long Life
- Includes Bronze Gear, Rubber Insert, T-Brace and Gasket

Re-Engineered for even longer lasting life! Now upgraded to include a newly engineered special steel brace with a special plastic support bushing. **Note About Glue Failure:** We have noticed glue joint failures in the late 2000-2004 C5 plastic housing motors. Glue joint failures happen because the plastic that these headlight motors are made of does not take any adhesive well. The glue joint surface is small and once installed it has to take a tremendous force that occurs when the headlight gets full open and full closed and stops abruptly. For the late 2000-2004 C5 headlight gear kits we have added a special stamped steel brace with a special plastic bushing. This brace and bushing do two things. It applies a slight pressure against the side cover helping to eliminate side cover glue failures. But most importantly it adds a new bearing surface to support the shaft thus removing all the pressure of the shaft from the side cover and transferring it to this new brace. Once installed this repair should last the life of the car. The early (97-99 and some early 2000) C5's have an aluminum housing and do not need this special brace. Those headlight motor assemblies are very heavy duty and only require a new gear and rubber bumper. The 97-99 motor assembly (and some early 2000 models) is all aluminum and has a removable side cover that is held on with 3 machine screws. - Metal construction
- Replaces plastic original on 1986-1988 models

Important Installation Note: This is a reproduction of the 1989-1996 lock bezel. When used on 1986-1988 models, a slight modification is required. The hole on the deck of the 1986-1988 is 2mm smaller than 1989-1996, therefore you need to enlarge the deck lid hole 2mm in order for the bezel to lay flat.

There are many sounds and sensations Corvette fans look forward to experience when enjoying their favourite sports car. The rattling of a door window is definitely a sound an owner would want to eliminate as it may also result in scratches to the window's glass if not addressed. This condition is often a result of a worn anti-rattle door window bumper pad in need of replacement. This set of anti-rattle door window bumpers from Redline Restomotive® is suited to reduce the annoying rattling on 1969-1996 Chevrolet Corvettes.

- For installation on 1969-1996 Chevrolet Corvettes
- Replacement for factory original equipment
- Prevents window rattling and scratching
- Kit includes 4 felt-covered cushions and 4 metric-sized bolts

All tints will require some patience to install, this is not a 5 minute process. Average installation time is about an hour if this is your first time working with vinyl. You will need a heat gun or hair dryer, foaming glass cleaner, a squeegee, razor blade and paper towels. Some films are harder to apply than other and as difficulty level increases so do the complaints about the product from installers who are not practiced in vinyl application. Please have professionally installed if there is even a doubt after reading instruction. All kits include installation instructions and there are many you-tube videos offering how-to's as well.

If the item is not repairable it will be returned to the customer at the customer's expense. Items returned after 30 days in the original packaging you will be issued a refund to the original terms on the invoice less a 30% restocking fee. Items returned after 30 days not in the original packaging will be returned to the customer at the expense of the customer. No returns on electrical products or tools. Returns will not be accepted for any orders older than 90 days. No returns of a partial set, parts will be mailed back to the customer at customer's expense. (xxi) Pricing Policy: Prices, part numbers & policies are subject to change without notice. Please visit our website at %website% or

call us at %phone% for the most current pricing.

(xxii) Electrical Item Warranty: Motor City Vettes does not allow any refunds on electrical items, they can only be returned for exchange. All items that fall under this policy will be outlined in a disclaimer below the product name on the shopping cart page along with the product invoice. The reason that there are no returns on electrical items is that too many people try to take advantage of the return system. Instead of using proper diagnostic procedures, some people resort to trial-and-error parts swapping when they don't know how else to fix an electrical problem. When parts they have installed do not fix their problem, they want to return them and try something else. Electrical parts are easily damaged by improper installation or testing. Because electronics are very sensitive to voltage overloads, it does not take much of a voltage spike to ruin a component. Unplugging a wiring connector while the key is still on can create a momentary voltage surge of hundreds of volts. Crossing up the wrong wires or using the wrong test procedures can also damage sensitive electronics. We have no way of knowing whether or not the part has been used or damaged. Because of these risks there are no returns on electrical components. This policy will protect the next customer who might get a bad part that had been returned. Electrical items that are found to be defective within the first 30 days after receipt of product will be covered by our warranty policy. There are no exceptions to this policy.
